San Diego Jetboating - "Bruce"

The "Bruce" was Australian designed and Bentz built to offer high speed and "thrilling" turns in the San Diego harbor. With triple 5.7L engines and Hamilton 213 jet units the boat offers its 22 passengers a high degree of maneuverability and excitement. The driver has the ability to control how wet the ride becomes and controls where. The vessel operates using hydraulic steering and shift along with a foot actuated throttle. With US Coast Guard stability standards to an exposed waters criteria the vessel can safely operate in a wide variety of water conditions.

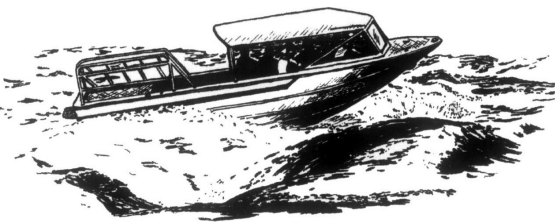

Bentz Boats has set the standard for quality and innovation for over 40 years. Since our 1st aluminum jetboat built in 1970 we have developed superior quality, efficient and agile handling boats. Through years of personal and commercial use, customer feedback and innovative designs, Bentz Boats has acquired a domestic and international clientele not only for our superior boat design but also our commitment to quality. Attention to detail and a high quality build standard makes Bentz Boats extremely tough with a high degree of impact resistance and helps ensure that each boat operates with a minimum of maintenance.

Bentz Boats has developed our hull designs to operate in the conditions specific to each customer. From shallow, fast running rivers to open saltwater conditions. Each boat is designed with passenger comfort, stability and safety in mind.
