

# Bentz Boats, LLC

## POSSIBLE USERS

**GUIDES AND OUTFITTERS** – high maneuverability, shallow draft, open fishing design, and rugged construction allows comfortable access to remote fishing and hunting opportunities.

**EXTREME WHITEWATER ADVENTURES** – the shallow draft, rugged construction, powerful engine and pump combination with the turbo impeller make this boat a natural for whitewater enthusiasts seeking new rivers to navigate.

**GOVERNMENT AGENCIES** – constructed to exceed USCG certification standards this boat will allow law enforcement, wildlife management, search and rescue, fisheries and the military years of dependable, trouble free service.

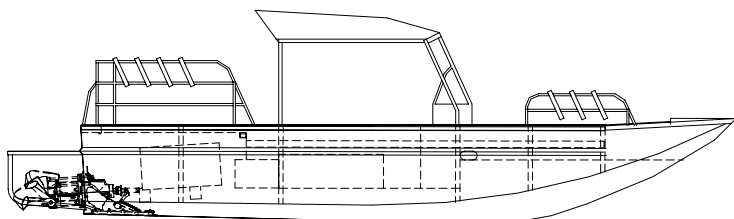

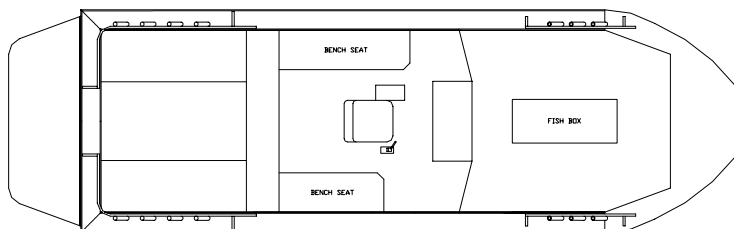

**Z&S Outfitters of Tygh Valley, Oregon purchased this modified sled boat for their guided fishing and hunting excursions on the Deschutes River in Oregon and the Snake and Salmon Rivers in Idaho.**

The modified sled offers the same fishing platform of a true open sled but with the opportunity to stay covered during transport or when the weather conditions turn unfavorable. A Yanmar 315 hp diesel engine and Hamilton 241 jet unit with a turbo impeller allows the boat to perform well with great fuel economy.

Features include a forward and aft fishing platform, fly rod holder integrated into the top for transport, bow ladder, passenger bench seats, forward and aft rails with rod holders, forward fish box and self draining motor cover lids. Self bailing decks forward and aft keeps the boat well drained when whitewater or sea conditions become rough.

Standard Bentz engineered features include the sled shaped bow, mechanical stick steering, delta pad bottom and our standard bracing system that gives the boat high structural integrity.
